

**NC GreenPower**  
The power to choose. The power to change.

**The power to choose.  
The power to change.**

You can help make a difference to North Carolina's environment for as little as \$4 a month. Every \$4 block will add 100 kilowatt-hours of renewable energy to North Carolina's power supply. For your convenience, your tax-deductible contribution will be added to your monthly electric bill and will go directly to NC GreenPower. Together, we can make a difference. Whether you are a resident or a business, make NC GreenPower part of your commitment to a cleaner environment.
